DEGATING WORK CELL

- Turn-Key Operation
- Can be used for multiple parts; custom fixtures will be required to be made for each part to be used
- Minimal cycle time
- Full safety enclosure
- Cleanroom hepa filter vacuum installed below tabletop to ensure no contamination or particulates.
- Adjustable level rolling casters allow for work cell to be easily moved from press to press or into a secondary operation area.
- Utilizes smart motors and intelligent actuators for precision movement.
- Able to hold tolerance of $\pm .0005$ on cuts
